Bose® music-to-go package

Summer is here. It's the perfect time to get outside, hang out with your friends and listen to some music. If you have an iPod, Bose has a plan to take your music on the move.

Bose music-to-go package. Their To-Go Pack includes the Bose Portable SoundDock in Gloss Black, custom travel bag, spare battery and remote in one convenient bundle. It provides Bose quality sound for your compatible iPod wherever you like, plus system protection during travel and more hours of paying time when you arrive.

The SoundDock Portable system was engineered so your iPod can be enjoyed in more locations without compromising your music's sound quality.

The recharging lithium-ion battery and the included spare together will play more than 6 hours - more than conventional rechargeable batteries can deliver. Change the battery out

or plug in for more play time. With the auxiliary input, you can also plug in and listen to any portable DVD, CD or MP3 Player.

The iPod dock rotates to disappear for protection during transit and the built-in handle makes it easy to carry from room to room. The custom travel bag offers extra protection for your iPod, remote control and other accessories when taking longer trips.

Tech Tip Of The Month - **How to Connect your Laptop to a TV**

Laptops once used to be the domain of word-processing programs, file databases, and light gaming, but more often than not most people currently use their laptops as makeshift do-it-all interactive televisions. With the abundance of streaming video sites and TV/movie content available, they're often the most versatile entertainment products on the market, pound for pound.

Unfortunately, you're locked in to a screen that often has limited viewing angles and a resolution that's often less than 1080p. There's good news, though: connecting to an HDTV is a lot easier than most people think.

- If you have a Windows laptop, odds are you

have an HDMI-out port--if your laptop was made in the last year or so. That's a huge help for TV connectivity. Many laptops simply connect automatically once an HDMI cable is plugged in to a TV, but you may have to adjust your display settings in the Windows control panel or change your TV's picture settings to get the best fit. One important tip: unless you turn off mirroring of your TV and laptop's displays, you won't get full 1080p resolution to take advantage of your big screen. Set your laptop to output to whatever display is labeled with the make of your television (Samsung, for instance), hit "apply,"

System Backup and Recovery - A Must for All Businesses

Today, all different types of companies run their businesses and store important and sensitive information on their computers. Even if you own top of the line computers, run all updates and have a firewall the Pentagon would be proud of; hard drives will fail, viruses will be accidentally downloaded and someone will delete the important doc you needed 10 minutes ago. From inventory and product prices to employee payroll and sales history, all of the pertinent information about your business needs to be backed up for a safe and speedy recovery.

Below we have put together a comparison of 3 different companies that offer Backup and Recovery. You will notice that they offer most of the same services. The differences can be found in the level of backup you need: How many Workstations, Servers, and GB of Data that you are backing up.

Mozy Pro

Automatic or scheduled backups.

Local backup with Mozy 2xProtect™: Windows users can back up locally to an external device as well as online to Mozy data centers for double protection.

Block-level incremental backups: After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.

Version (snapshot) support: Restore file versions up to 30 days in the past.

SQL, Exchange, and network drive support: Backs up common business applications running on Windows servers.

Open and locked file support: Backs up all open and locked files, including Outlook PST files.

Encryption: All user data is encrypted with military-grade encryption prior to transfer via a 128-bit SSL connection. Choose a managed key or a personal key for added security.

Alerts: Create email alerts regarding backup health. Schedule alerts on a daily, weekly, or monthly basis.

Multiple restore options: Restore data via the Mozy software client, the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.

Acronis

Automatic or scheduled backups.

Dual destination, Event-based and Conditional backup: Store backups to a local disk and a copy to a network share. Create backups triggered by various conditions such as user logs on, computer shut downs, or others.

Excluding files during backup: Save storage space and time by excluding non-essential files and folders from backups.

Live disk snapshots: Acronis Backup & Recovery 10 takes a 'snapshot' of the disk, eliminating the need to take a server offline for a backup.

Automated deletion of outdated backups: Specify rules to automatically delete backups that are no longer needed.

Encrypted backup images: Encrypted backups use industry-standard 256-bit AES algorithm to ensure data security.

Enhanced archive validation: Confirm that your backups are complete and your server and data will be recoverable.

Recover an entire system, single file or folder: OS, applications and all data can be fully recovered in minutes, instead of hours or days.

Please contact us to discuss the level of protection that your company needs. 909-287-7900

Barracuda

Automatic or scheduled backups.

Full Local Backup: The Barracuda Backup Server offers sufficient storage for a complete copy of an organization's current and historical data.

Change Detection Backup and Rate Control: Schedule backups as often as every few minutes for constant data protection. The rate control feature provides preservation of Internet bandwidth during peak usage and optimizes offsite backup transfers during daily non-peak hours.

Exclusion Rules: Common exclusions include music, movies or other files deemed non-essential to the organization.

Barracuda Backup Service: Makes three backup copies of primary data: one local backup and two offsite data backups to geographically-separate data centers.

Secure, Redundant Replication: AES 256-bit encryption. Their two offsite data centers use highly redundant and encrypted disk-based hardware.

Alert Notifications. Email alerts sent to administrators when service issues are detected: errors or missing files.

Fast Local Restore: Restore data directly from the Barracuda Backup Server at local network speeds. This is the quickest way to recover lost data or recreate historical data.

Control 4 2.0 - Will You be Upgrading?

Elegant Flash-Based Navigator Interface

It's easy to customize your home page, wallpaper themes and screen savers. Add favorites, use programmable buttons to set lighting or music scenes, create playlists and more!

Support for Exciting New Hardware

Control4® OS 2.0 is based on industry standard ZigBee® Pro technology. This means that you can easily integrate new devices into your system- like the new Black & Decker Kwik-Set door locks.

Faster Access to Your Favorite Content

Control4® has added a feature that allows you to easily mark your favorite pages. We can then program page flips to direct the display on the Navigator to a specific page with one touch.

With 2.0 performance improvements you can access your media faster and schedule your media scanning to occur when it's most convenient for you.

Introducing the 4Store™ Application Marketplace

The application marketplace is designed exclusively for the digital home. With apps you'd know from the Web or a mobile phone, plus those featuring control of entertainment, energy, security and window shades, your Control4® system can get better and better with every download.

Set up a 4Store account online, and then purchase and download 4Store applications. Check the daily weather report, review top news stories, change codes on your KwikSet® locks, and play games from any Control4® Touch Screen. Some Apps available now are: Facebook, Twitter, RSS Feeds and Ebay. The Dinner Out app searches for local restaurants and makes reservations- Free.

NOPE... IT CAN'T BE DONE ONLINE... YOU ACTUALLY HAVE TO TAKE THE RAKE OUTSIDE

Showroom of the Future Update!

The Innovative building has been upgraded to Control 4's 2.0 Operating System!

Between upgrading our Automation System, Installing new 3D Products and still keeping up with our client's needs, we have been very busy. We always want you to be able to come down to your trusted local showroom and test drive the

products and services that you are curious about.

Once we have all the products installed and user ready, we will send out an email so you can come in and see all of the new Control 4 2.0 features as well as our Samsung 3D LED HDTV. We look forward to seeing you!

Tech Tips - Continued from pg. 1 ...

and then a full range of resolution settings should open up for you to try. Some may work better than others.

- If you don't have HDMI-out, there's always VGA. The universal and ever-handy port is featured on a surprising number of HDTVs, and if you have it you can connect VGA-to-VGA with the appropriate cable. VGA only carries the video signal, however: for audio you'll need to go through the laptop's audio-out jack, which in some cases doubles as an optical audio-out port. You can buy a cable splitting off to RCA outputs, or plug an audio cable into an external speaker bar.

Don't be intimidated: these days, laptops are made to pair with your TV.

Receive an American Express Gift Card

Thanks to loyal customers like you, INNOVATIVE is growing faster than ever! We certainly couldn't have done it without the help of our customers referring their friends and colleagues. That's why we'd like to thank you for your referrals with an American Express Gift Card.

All you have to do is refer a business owner or IT Manager in the Corona and Chino areas to INNOVATIVE who is looking for any of the services we offer. As a token of our appreciation, we'll send you a gift card.

Just consider this our way of saying "Thanks!"

To send us a referral, simply call President John H. Johns at 800-875-5675 Ext 101 or send him an e-mail to info@purelyinnovative.com. Tell your friend or colleague to mention your name when they call.
